

TCS-3829-58

Copy 6 of 6

22 September 1958

MEMORANDUM FOR: Director of Operations DPS/DCI
(ATTENTION:)
Chief, DMD/PIC

25X1A

SUBJECT : U.S. Air Force Film Requirements

REFERENCE : TCS-3828-58, 19 September 1958

1. The attached memorandum confirms the Air Force standing requirement for Air Force film reproduction for ODE material (currently to include the OXY material on the CHICOM area but not to include the Middle East material), namely, three duplicate positives.

2. It also requests one duplicate negative for ATIC with justification. This justification is in order and in keeping with ARC discussions on the geodetic problem. Accordingly, I recommend that if at all feasible the factory be authorized to make the duplicate negative in addition to the duplicate positives.

3. If arrangements can be made and if you approve, would Operations DPS/DCI so indicate on the attachment designated for the Air Force and forward to the originator.

JAMES Q. REBER

Chairman

Ad Hoc Requirements Committee
